

Monsoon 3 Adventure Waterproof Panniers

SKU: LUSA-005

Description – 4 Fold Protection

WEAR PROTECTION: The outermost layer of the 3-layer fabric is made up of heavy duty polymer which acts as superior wear protection. With an all-welded design it makes the Monsoon 3 even tougher.

TEAR PROTECTION: The middle layer consists of 1000D Nylon mesh which is densely woven yet flexible to allow the 1000D Nylon filaments to align in the direction of the stress.

WATER PROTECTION: The innermost layer of the 3-layer fabric is made out of red vinyl for perfect visibility and 100% waterproofness. Unlike hard panniers, the roll top closure does not permanently bend in the case of a crash, keeping your items fully waterproofed.

IMPACT PROTECTION: At the front, underneath and at the rear we have added a high impact plastic to protect the contents of your bags from loose gravel and surprise branches.

Features

- 2 fold-away separators per bag: Fold them in to divide your bag, fold them away to have one large compartment Holds up to 6 isolation bags (separately available)
